Position: Dev Ops

Location: DENMARK, Copenhagen

Loyal Solution's sole purpose is disrupting the loyalty industry with new technology, new transparent concepts and a 100% focus on the end customer.

We have become a leading global provider of loyalty concepts, solutions, and technology. Our proprietary technology and global private cloud solutions are state-of-the-art and market leading. Our SaaS solutions are used by some of the largest global programs such as Etihad Airways, SAS EuroBonus, Accor Hotels, and we are close partners with Visa, Mastercard and American Express.

Main responsibilities:
In close collaboration with the IT team you will from day 0 be heavily engaged in:
• assisting the deployment of new releases in the cloud
• helping automating the infrastructure deployments and operations
• maintaining a high level of infrastructure security, aligned with PCI DSS compliance
• helping to identify bottlenecks, optimizing and scaling existing and future solutions
• monitoring and maintaining a high level of application reliability
• maintaining / developing PHP web applications & proprietary systems based on Laravel framework
• maintaining / developing systems that use MySQL as a database engine
• maintaining / developing our suite of APIs
• maintaining / developing integrations with customer APIs / SFTP servers, etc.

Required profile:
• Most importantly you are a nice person! You know how to work independently but you also enjoy working in a team contributing with new ideas, and make your views known.
• As a professional you are talented, inquisitive and creative. You have a relevant educational background from IT and experience working as Dev Ops. It is a requirement that you have experience, interest and flair for cloud technologies / hosting environments.
• Preferably (not a requirement) you will also have some experience in working with GCP (Google Cloud Platform), Kubernetes, Docker Containers, CI/CD, testing, nginx, certificates, SSL, SSH.
• You must be able to, and enjoy, working extremely structured, as we work under a host of data privacy and security regulations including PCI DSS and operate under supervision of the Danish Financial Authority (Finanstilsynet).

The company offers:
• The position is permanent and full-time, meaning 37 hours.
• The salary will range from 4.000–6.722 Euros/month, depending on qualifications.
• The compensation package, which is negotiated individually, consists of a fixed salary, phone, internet, PC, lunch, unlimited black coffee, sodas, Piratos and an attractive pension scheme.
• You will be part of a great team and an exciting innovative company on the fast track forward.
• Work from home will be possible with special permission.

How to apply: please submit your written application by clicking the apply online via this link:
https://www.jobindex.dk/ansoegninger/ny/1469018, including a CV with a photo, ASAP. You will be asked to provide a criminal record certificate.
