

## Position: Fire Fighting Specialist | Pipe Design

Location: Bratislava, Eslováquia

We are the largest producer of electricity in Slovakia and one of the largest in Central Europe. We have 2 nuclear, 31 hydro, 2 coal and 2 photovoltaic power plants. As the largest private investor in Slovakia, we offer stable employment and almost 80 years of experience in energy. We are ECO, because we produce up to 95% of electricity without greenhouse gas emissions, which makes a significant contribution to the fight against climate change.

### Job description

- Proposal and review of FF pipe routing (creation of isometric drawings, layouts)
- Coordination and evaluation of detail design modifications
- Technical support for solving technical nonconformities (NCR)
- Site surveys in order to define optimal technical solution, in terms of pipe routing and aux steel supports position, taking into account site and general and specific FF technical constrains
- Update of already existing piping layouts by incorporating new modification agreed with other disciplines (process, electrical, I&C, civil) and validated by stress department
- Assessment of design modifications impacts on pipe routing of firefighting systems
- Preparation of technical specification for purchase of material or a part of the system

### Who we look for?

- University degree within technical field of study
- At least 5 years relevant experience in piping area
- English at communicative level / B2
- MS Office, AUTOCAD expert
- PDMS 3D MODEL, software Caesar II – advantage
- Recommended training of Firefighting piping system
- Flexibility, ability to resolve problems, analytical thinking
- Good communication skills, autonomy, team cooperation

### What do we offer?

- Extra 5 days of paid leave – we know the importance of rest
- Flexible 7,5 hours working time – results are what counts, not if you are at work at seven
- Contribution to the 3rd pension savings column – we think about your future
- Catering possibility using the catering cards or in a canteen; catering contribution entitlement is preserved also during sick leave

- Possibility to use better electricity prices for you and your family at privilege rate from our contractual partner
- Financial reward at employment anniversaries – we appreciate loyalty and devotion
- October 1st, we celebrate "The day of Energy"- our employees have day off or the same salary advantage as during Public holiday
- If you happen to be on sick leave for extended time, we will also support you financially

### **Other benefits**

- Personal development, professional and career growth – education and trainings
- We welcome any innovations and new ideas; profit is shared with employees bringing such ideas through the Exchange of ideas
- Rewarding of the best teams, teambuilding or company activities at each occasion – either our own “Winter sports games”, “Best teams” or nationwide events, such as “Ride the bike to work”, “Our city”, and many other
- Severance pay at retirement – above the legislative scope
- Internal competitions – you can win backpacks, T-shirts and other company presents
- Possibility to use Multisport card and other interesting benefits offered by external partners every day
