Position: Project manager control engineering
Location: Germany, Ravensburg

For permanent placement we are currently looking for about 10 engineers for our client in the automotive industry, one of the top suppliers in the automotive industry. This company develops, designs and builds machines and robots for the automotive industry that are assembled in plants of their customers in Germany and abroad. The company employs approximately 1,750 employees.

Main responsibilities:
- Technical conception and planning of control architecture in plant engineering for sub-projects in the automotive industry.
- Creation of supplier inquiries and evaluation of the offers and selection of possible suppliers.
- Ensuring that projects are completed on time, within budget and to the required quality.
- Standards, including change cost management.
- Participation in the coordination of the construction and commissioning phase.
- Creation of project and process documentation.
- Contact person for our customers and sub-suppliers.

Required profile:
- University degree in the field of electrical engineering, mechatronics or a comparable field.
- Willingness to travel (approx. 40% per year).
- Construction site and commissioning experience in body shell construction is desirable.
- Knowledge in programming SPS controls.
- Design experience in the field of hard- and software.
- Good English language skills are required.

The company offers:
- Permanent position. 40 working hours/week. 30 days of vacation.
- Gross salary about 50,000 € depending on qualifications and experience.
- Language courses in both German and English.
- Housing for the first 3 months and initial training plan.
- Company pension plan; Meal subsidy at the restaurant; health-promoting initiatives.

How to apply: CVs can be sent per email to marcus.erdmann@randstad.de with a copy to dora.silva@iefp.pt under the reference “Project manager control engineering – Ravensburg”
