

EURES Portugal and Denmark are promoting several job opportunities for FUJIFILM Diosynth Biotechnologies

FUJIFILM Diosynth Biotechnologies is an industry-leading Biologics Contract Development and Manufacturing Organization (CDMO) with locations in Hillerød, Denmark, Teesside, UK, RTP, North Carolina and College Station, Texas, USA.

Our site in Hillerød, Denmark, brings together expertise, capabilities, and technologies to manufacture advanced biologics. The large-scale manufacturing facility has a capacity of 120,000 liters to reliably manufacture biologics for late phase and commercial use. We commenced 6 billion DKK projects to double our manufacturing capacity and to add fill finish to the site.

We aim to foster a collaborative, innovative and rewarding environment, where diverse perspectives and people come together united by a common purpose and shared values. We pursue our fullest potential as individual contributors and team members. We strive to be the employer of choice and offer a competitive compensation and benefit package.

As we continue to enhance and expand our capabilities, we are looking for people who share our passion, drive, and energy – what we call Genki – to join our team.

Roles, Tasks & Qualifications

[Lead for Quality Deviations \(Resilience Engineer\)](#)
