The tasks in our workshops range widely within industrial technical repair tasks such as: electric motors, generators, pumps, gears, and ventilation. You will be referred to the head of the workshop.

Required profile:

- You have a technical education as an electromechanical engineer.
- You must be experienced in rewinding electric motors and generators.
- You have experience in repairing electric motors, pumps, gears and ventilation.
- You have experience with repair and troubleshooting in industrial production facilities.
- You are working independently and are solution oriented.
- You have a good mood and emphasize good cooperation and flexibility.

The company offers:

- Permanent full-time position.
- Salary: 200 kr per hour (app. 26,6 EUR).
- You will be part of an open and flexible organization with short decision paths.
- A four-day working week is possible.
- We will find you a place to live and pay for the first month in Denmark k. Then we will of course help you find a smaller apartment or room.
