

Position: Quality Control Chemistry Analyst - 1

Location: Malta - HAL FAR, BIRZEBBUGA

APL Swift Services (Malta) Ltd is a wholly owned subsidiary of Aurobindo Pharma Ltd, one of the world's leading generic pharmaceutical companies. Based in Malta since 2007, the company provides analytical, logistical, warehousing, distribution, and batch release services to the pharmaceutical industry from its state-of-the-art facilities at the Hal Far Industrial Estate. Serving clients across Europe, APL Malta is recognized for its high-quality standards, rapid turnaround in product analysis, and integrated solutions that support access to both EU and MENA markets.

Main responsibilities:

- To prepare, standardize and label stock solutions and laboratory reagents as required.
- To routinely monitor and analyze the water supply according to Company procedures.
- To ensure that all equipment, apparatus and premises of the QC Department are functional and suitable for their intended use, by performing maintenance and calibration as instructed. Apparatus should be handled in the proper manner and not in a way which may be detrimental to its function.
- To assist outside contractors in performing calibrations throughout the company and keep records of these according to standard procedures as required.
- To report LIRs and deviations in a timely manner.
- To work out calculations pertaining to analysis and produce the relevant documentation in association always in compliance with EU GMP. To ensure proper filing and easy retrieval of all documentation and records pertaining to the QC Department.
- To assist the immediate superiors in problem solving exercises and other exercises aimed at improving quality and efficiency.
- To perform laboratory equipment qualification and calibration according to a predetermined schedule.
- To perform method validation as required.
- To maintain records of stocks of reagents, equipment spares and reference standards in such a way as to report when re-ordering is due.
- To support the Technical Services personnel on laboratory investigations resulting from OOS, OOT and OOE results and any deviations arising from the QC laboratory.
- To investigate and perform the prescribed hypothesis testing and analysis in conjunction with any quality and root cause analysis investigations.
- To follow and document precisely all activities as described in the relevant Standard Operating Procedures (SOPs), Test Methods and Protocols.
- To perform all duties as laid down and any additional duties as may be allocated from time to time by the QC Manager or delegate in a proper professional manner and in the best interest of APL Swift Services (Malta) Ltd.
- Execute product testing as per the approved methods of analysis.
- Inputs generated lab data in LIMS.
