Position: AUDIO PROGRAMMER
Location: MALTA, Hal Lija

PlayMagic is a game studio that design and develop games based on high profile licenses and original IP across a wide range of formats for the hard-core market segment.

Main tasks:
- Designing, implementing and testing of game functionality based on design, using Unity3D
- Write clean, professional and maintainable code
- Continuous refinement and optimization of existing code
- Accurately schedule tasks and complete them on time, with an understanding of and appreciation for milestones, schedules, deadlines and efficient development processes
- Produce prototypes of gameplay ideas and features
- Communication and collaboration with other team members in different departments (e.g. Art, Design, Production)
- Proactively problem-solve performance and stability issues when necessary
- Identify bugs and issues and suggest solutions to mitigate problems
- Ensuring a high product quality, together with Quality Assurance
- Support and contribute to new ideas to game design and implement proof of concept
- Implementing audio assets into the game
- Integrating audio systems in game subsystems
- Responsible for testing and debugging code and providing technical support for the audio tools.

Required profile:
- Bachelor’s Degree in Computer Science or similar discipline or equivalent work experience
- Advanced C++/C# programming skills
- Excellent 3D Math and Linear Algebra skills
- Familiar with modern practices of object-oriented programming and processes
- Use of middleware audio APIs like Miles, FMOD, or Wwise
- Strong written and verbal communication skills
- Advanced level of English language.

The company offers:
- Indefinite contract duration. Flexible work hours.
- Salary: Depending on seniority between €24,000 – €32,000.
- Logistic and documentation help with relocation.
- Sponsored relocation package for employees depending on seniority.
