Position: Glass grinder  
Location: Norway, Jevnaker

Hadeland Glassverk was founded in 1762 and is Norway’s oldest industrial company with continuous operation. We are still today a vibrant craft company that manages an exciting history and cultural heritage. The production of glass at Hadeland Glassverk still takes place according to the same methods as over 250 years ago.

With the applied art movement, the lavish sanding disappeared from the turn of the century, and instead came light sanding, flower sanding and etching as decoration. It also became "fashionable" to make completely undecorated glass, which was previously almost unthinkable. Hadeland Glassverk is today associated with so-called small glasses, which include everything from wine glasses to bowls, dishes, flower glasses, vases and in the last 60 years also art glass and crystal figures.

Hadeland Glassverk manages a significant history and cultural heritage, at the same time as we focus on continuous development and new design to meet the needs of the future. The glassworks has undergone a major and positive change process over the past 20 years, and it has created new dynamism and faith in the future.
