Position: Resource Geologist

Location: SWEDEN, Pajala, Norrbottens

Kaunis Iron is a new and modern mining company in Pajala, Swedish Lapland running open pits and mine iron ore which is processed and sold to the world market. Thanks to sustainable production, a strong culture, a skilled business and world-class facilities, Kaunis Iron takes a position as an innovative upstart in the global market.

The company is looking for a driven and committed Resource Geologist who wants to contribute to a sustainable mining operation in Pajala. As a Resource Geologist, you are part of the mine planning department that is responsible for both short and long-term mining planning, surveying, geology, and grade control and will report into the Mine Planning Manager.

The work will be in an environment of constant change placing a high demand on safety and safety awareness.

Main tasks / responsibilities:

- Responsible for the development and updating of block models for various iron ore deposits
- Support, involve and educate younger geologists
- Help shape routines and working methods as we build our young organisation
- Work in close cooperation with the exploration department and be involved in the development of their projects
- Follow-up of mined and processed ore in the mine (reconciliation).

Required profile:

- University graduate in geology
- Practical and theoretical knowledge in ore modelling/resource calculation
- At least five (5) years of relevant experience in exploration and/or mining operations. It is advantageous if you have previously worked with iron ore.
- Knowledge about PERC or another CRIRSCO-based reporting standard is required.
- Ability to manage software such as Leapfrog, Surpac, Vulcan or Datamine is a requirement.
- English and/or Swedish is a requirement and Finnish is a merit. (e.g. driving license, specific certificates, …)
- Valid Code B drivers licence is also a requirement.

Personal Characteristics:

- You work well with others. As a person you are responsive and flexible with an interest, willingness and the ability to help others whilst striving to deliver solutions.
- You are highly efficient at working collaboratively, and listen, communicate and resolve conflicts constructively.

The company offers:

- Full-time, permanent position
- Salary is individually negotiated, however leave and other social benefits are structured according to the local, collective Swedish Civil Service Agreement

How to apply: Email your application in English to rekrtyering@kaunisiron.se and Cc nidia.figueiredo@iefp.pt referring Resource Geologist – Sweden
